COMPANY PROFILE IT · 2026

Your trusted IT partner in Indonesia

Software, infrastructure and daily IT support for Japanese-affiliated companies.

PT AUN WAHANA JAYA · Jakarta

ABOUT US

Your IT partner in Indonesia

PT AUN Wahana is a Jakarta-based IT solutions provider and software house with Japanese management, serving mainly Japanese-affiliated companies in Indonesia, from software to infrastructure to daily IT support.

Jakarta-based

Japanese management

01

Software Development

Custom web & mobile systems and AppSheet low-code applications.

02

Business Software

Realtime BI, UiPath RPA, BarTender, Hadirr & Gadjian, Google Workspace.

03

Infrastructure & Security

Fortinet firewalls, network & WiFi, servers and backup.

04

IT Support & Consulting

Managed IT support, maintenance contracts and IT consulting.

One partner from software to server room.

OUR VISION

Become a trusted partner to create and develop a better future.

Our Mission

1

High Quality

Provide high quality products and services.

2

Innovation Environment

Create an environment where each employee can achieve their best and challenge their limits by using and developing their various abilities.

3

Respect & Control

Respect the rules as a corporate citizen and contribute to society.

Realtime BI

Powered by MOTIONBOARD

A data visualization cloud service with various BI features equipped with innovative 3D dashboards, real-time monitoring, automatic report generation and integrated with various data sources.

AHM

Visual QC checking process of NG and FG part count calculation to facilitate the QC operator's work

DAISHO 大松精機グループ

Oil Control Monitoring

Monitoring oil changes on the items of each machine so that there are no delays that will interfere with machine productivity

BarTender
BY SEAGULL SCIENTIFIC

BarTender provides easy-to-use label design tools, on-demand printing, and integration with your business data and systems, ensuring regulatory compliance.

- Standardized and centralized labeling guarantees that data integrity and compliance are maintained for auditing and traceability purposes.
- Linking your labeling directly to your business data reduces the likelihood of manual data entry errors by print operators.
- Printing labels where work occurs enhances workforce efficiency, leading to decreased labor and training expenses.
- Incorporating your labeling processes into your business systems automates operations, enhancing cost-effectiveness and adaptability.

DAISHO 大松精機グループ

Warehouse Management System

Print barcode labels with data retrieved from the warehouse management system and the label design can be customized by the user

Website & Application Service Development

Developing a web system or mobile phone application by scratch according to your needs

Custom Website System
